

FORTHEM Collective Short-Term Mobility

FORTHEM Inclusion Upgrade

Organising university: University of Burgundy

Location of the event: Dijon – University of Burgundy

Organisers: ESN InsiDijon is part of ESN (Erasmus student network) and we aim to welcome and integrate all the international students coming to Dijon, as well as the other youth in mobility. Our second objective is to promote and help local students getting an international mobility experience.

Project description: We want to offer a complete mobility experience with the educational, fun and social aspects that Erasmus students can experience. We will create a safe space to live and reflect on what is mobility and how to make it better for everyone, focusing on topics such as disabilities, less opportunities, financial difficulties.

We also want to create bounds between the participants and local community through meetings and discussions. The final goal will be to create a guide of inclusive mobility for the FORTHEM Alliance universities designed and written by the people affected and being complementary with the former reports on the barriers for mobility.

Day by day programme:

Day and date	Morning	Afternoon	Evening
27.09.2021	Arrival / Visit of the University of Burgundy and all the services	City tour of Dijon and some cultural places	French dinner
28.09.2021	Workshops: - Get to know each other (intercultural exchange) - What's mobility to you?	Encounter with youth from local youth and community centre	International dinner (everyone bring something from the home country)
29.09.2021	Workshops: - What's the main barriers to mobility? - How to upgrade mobility? (create more inclusive mobility)	Encounter with students with disabilities. Meeting with student association helping disabled students	Free evening
30.09.2021	Encounter with youth from rural field	Creation of the mobility upgrade guide for inclusiveness	International party (with other international students of Dijon)
01.10.2021	Visit of Beaune Summary and feedback on the week		Departure

Eligibility criteria and selection criteria specific to this project: We are looking for students from any field or any scholar year, with specific profiles to fit the topics of discussion and get responses and feedback from the concerned public. We will prioritize students with disabilities (any form), students from rural areas and students with scholarships.

To apply please attach a motivation letter describing personal projects.
