

## ***FORTHEM Collective Short-Term Mobility*** **Artificial Intelligence and Society**

**Organising university:** Johannes Gutenberg-Universität Mainz

**Location of the event:** Mainz, Germany

**Organisers:** FORTHEM Digital Transformation Lab of the Johannes Gutenberg-University Mainz

**Project description:** This spring school will combine social science and technological perspectives to provide insights into how Artificial Intelligence (AI) systems shape social contexts and vice versa. Recent advances in AI are leading to increasingly autonomous intelligent systems. Numerous applications can already be found in daily life. This interdisciplinary course sets out (i) to learn from experts what AI systems are capable of and what they need to “know” about human behaviour and social contexts and (ii) to experiment in topic-related student group projects on how this knowledge might be integrated into AI systems.

**Day by day programme:** 28.03.2022 - 01.04.2022

<b>Day</b>	<b>Morning</b>	<b>Afternoon</b>	<b>Evening</b>
<b>Day 1</b>			Get together meeting
<b>Day 2</b>	Welcome and introduction of participants; Input by an expert; Fishbowl with expert and attendees	Project work introduction	Evening talk
<b>Day 3</b>	Input by 2 experts; Fishbowl with experts and attendees	Project work	Evening talk
<b>Day 4</b>	Input by 2 experts; Fishbowl with experts and attendees	Project work	Evening talk
<b>Day 5</b>	Project presentations and wrap-up		

**Eligibility criteria and selection criteria specific to this project:** \* A CV and a statement of interest will be requested with the summer school application.
