**Virtual workshop: Experiencing Europe together**  
**30.9.2021 12-16 CEST / 13-17 EEST**

FIT FORTHEM and the Universities of Opole and Jyväskylä are hosting a free-of-charge virtual workshop to network and discuss about contemporary research in different fields. This workshop serves as a kickoff for sharing ideas, networking and starting new collaborations between the FORTHEM universities and university-external actors.

**Collaborate with us**

[Experiencing Europe Lab](#) is now calling university-external actors to collaborate with them, to further understand and work with the challenges and opportunities of different fields.

In this workshop, we will have a short introduction about the FORTHEM Alliance and Experiencing Europe Lab. We will cover how stakeholders from different fields, institutions and organizations can work with the seven FORTHEM partner universities.

After the introduction, academics from the FORTHEM Universities will facilitate sessions to discuss different themes with the workshop participants:

- **SESSION 1: 'Regional' Europe** - This session is dedicated to Exchanges of experiencing Europe via regions/regional perspectives in the face of changing roles of a border in the international relations.
- **SESSION 2: 'Educational' Europe** - This session touches upon European Union Studies as transnational studies: general remarks and application through innovative teaching methods.
- **SESSION 3: 'Europe of peace'** - This session is an introduction to the question of peace in multi-aspect perspectives.

These sessions will work as a starting point for future collaboration, with a short introduction given by the academics, followed by an interactive discussion with the participants.

**For whom?**

This workshop is for FORTHEM Universities, other academic communities and students, for people who work in public organizations and institutions, private companies, NGOs or associations, such as students' and graduates' associations. Also, public policy makers are most welcome to join us – who ever would be interested in having a dialogue with a European University. Language of the workshop will be English.

**Registration**

Register to the workshop by 28 September 2021 [from this link](#).
