

14-16 March, 2022 FORTHEM Food Science Lab and FIT FORTHEM welcomes you to the online event

Beyond the Horizon Europe and Green-Deal: How the FORTHEM Food Science Lab could contribute to EU goals – Presentation of research topics related to a healthy food system for people and planet within the FORTHEM Alliance

14 March: Scientific workshop

15 March: Matchmaking event with food industry representatives

16 March: Progress meeting and the future of the Lab

The European Green-Deal -Horizon Europe program focuses towards « a healthy food system for people and planet ». The link between healthy people, healthy societies and a healthy planet puts sustainable food systems at the heart of the European Green Deal, the EU's sustainable and inclusive growth strategy. The EU's goals are to 1) ensure food security in the face of climate change and biodiversity loss, 2) reduce the environmental and climate footprint of the EU food system, 3) strengthen the EU food system's resilience, 4) lead a global transition towards competitive sustainability from farm to fork

These objectives of the EU fit with the goals of the [FORTHEM Food Science Lab](#). The Lab addresses major societal challenges related to food, food production, feeding and health, reflecting current and future trends in human activity and their relationship to the environment. The second major challenge concerns the links between well-being, health, food habits and education.

AIM OF THE WORKSHOP

The aim of the workshop is to set state-of-the-art research topics carried out in the different research teams within the Alliance corresponding to the Green Deal objectives and calls (Cluster 6: Food, Bioeconomy, Natural Resources, Agriculture and Environment: [Fair, healthy and environment-friendly food systems from primary production to consumption](#) & [Call Circular economy and bioeconomy sectors](#)). Additionally, we aim to identify the main topics able to suit with the EU calls within the Food Science Lab, and to identify new partnerships and consortia to be created.

FOR WHOM?

Mon, 14 March – Scientific workshop (NO registration fees): Biotic, abiotic, social and educational researchers relating to sustainable food production are welcome and will be organized in parallel sessions. We encourage especially PhDs and PostDocs to present their research works in this session.

Tue, 15 March – FIT FORTHEM Matchmaking event: Academics and students of the FORTHEM Alliance, as well as representatives from food industry - Welcome to join the matchmaking event to network and brainstorm on joint projects for the future.

Wed, 16 March – Progress meeting and Future of the Lab: Everyone interested in learning more about the FORTHEM Food Science Lab: Researchers, students and non-academic stakeholders.

REGISTRATION

Register to the event by 10 March via [this link](#).
