

JES Jyväskylä Entrepreneurship Society

Jyväskylä Entrepreneurship Society

The name itself defines the core meaning of existence of our society, which is entrepreneurship. That is not all we do – we want to encourage people to develop themselves, which is also one of the two of our greatest agendas. We arrange a variety of events and accelerators circulating around aforementioned main topics. And above all, JES is a community to meet likeminded people across different fields of studies.

Suggested project(s)

- We know that there's lots of similar kinds of societies around Europe, and it would be great to bring that kind of organisations closer to each other. Main problems of going abroad is to not to have the base knowledge about local communities, ecosystems and culture. There is a lot of young students that wish to work abroad – but no channel to make it happen. This is something that these societies could come to aid.
- Every society would nominate a group in responsible of international communication which would work as a channel between these organisations regarding, for example, work opportunities and interesting topics regarding to international entrepreneurship – which enables far more efficient information flow amongst FORTHEM universities regarding entrepreneurship.
- This would also make it possible to arrange some kind of excursion travels amongst these cities – even collective excursion from several cities to one specific university.
